

Golf Camp Flow Test Checklist

Draft → Parimutuel Bets → Money Round → Presentation → Settlement

Testing Goal

Run one realistic nightly cycle end-to-end. The important question is not whether every screen looks perfect; it is whether the accounting chain stays coherent from draft teams through betting, scoring, presentations, and settlement.

Before You Start

	Step	Action	Expected Result / Notes
[]	Login	Log in as an admin account.	Admin-only controls should be visible.
[]	Open Tabs	Open one phone-sized browser and one TV/presentation-sized browser if possible.	Phone = commissioner/player flow; TV = draft/results presentation.
[]	Pick Test Data	Choose one already-created pending draft and its matching Money Round.	Example pairing: Friday Night Draft → Saturday Money Round.
[]	Players	Use enough test players to verify partial draft completion and payouts.	A smaller draft is okay; the Complete Draft button should now support this.

1. Draft Setup and Live Draft

	Step	Action	Expected Result / Notes
[]	Manual	In /admin/draft, select the test draft session.	Correct draft appears; status is pending or active.
[]	Manual	Confirm captain teams and draft order.	Captain team names are correct; no duplicate names; order is sensible.
[]	Manual	Open /draft/live on the TV-sized browser.	Presentation loads; On The Clock, On Deck, Last Pick, Available Pool, and team rail fit.
[]	Manual	Start the draft from admin.	TV updates; pick clock begins; available board shows ranked players.
[]	Manual	Make several picks.	Picked players are crossed off/removed as expected; Last Pick updates; On Deck advances correctly.
[]	Manual	Undo one pick.	Player returns correctly; team roster and pick order restore correctly.
[]	Manual	Finish the test draft using either all picks or the Complete Draft button.	Draft status becomes complete. Partial drafts should now be allowed.

2. Automated Bridge After Draft Complete

	Step	Action	Expected Result / Notes
[]	Auto	After draft completion, check for Parimutuel market state.	Parimutuel Bets should open for the next Money Round without duplicate markets.
[]	Auto	Check the linked Money Round.	If the matching Money Round exists and has no teams, draft teams should import automatically.
[]	Auto	Check Money Round teams.	Team names and players should match the finalized draft teams.
[]	Auto	Check LIVE CAMP FEED.	A feed item should announce Parimutuel Bets are open.
[]	Auto	Check draft complete TV screen.	It should say Draft Complete and Parimutuel Bets Now Open.

3. Parimutuel Bets

	Step	Action	Expected Result / Notes
[]	Manual	Open Parimutuel Bets as a normal player.	Markets are open and tied to the correct draft teams/Money Round.
[]	Manual	Place a small wager on Money Round Winner.	Bet saves; market pool updates.
[]	Manual	Place a second wager in the same market without exceeding \$20.	Multiple bets are allowed up to the market cap.
[]	Manual	Attempt to exceed \$20 in one market.	App blocks it with a clean max-\$20 message.
[]	Manual/Admin	Set tee time or lock betting from admin controls.	Market status becomes locked; no further bets accepted.
[]	Manual	Try placing a bet after lock.	Bet should be blocked; existing wagers remain visible/valid.

4. Money Round Scoring

	Step	Action	Expected Result / Notes
[]	Manual	Open the linked Money Round.	Teams imported from draft are present.
[]	Manual	Enter partial scores for at least two teams.	Leaderboard updates immediately; score-to-par uses only completed holes.
[]	Manual	Submit a team scorecard as a player/team.	Status should show submitted/awaiting verification.
[]	Manual/Admin	Verify one scorecard.	Status changes to verified; edits are still possible by admin.
[]	Manual	Enter all 18 holes for all teams.	Totals, OUT, IN, and score-to-par all look correct.
[]	Manual	Check skins preview.	Only completed holes count; unique low score wins; tied low score produces no skin.

	Step	Action	Expected Result / Notes
[]	Manual	Check easiest/hardest hole.	Based on average relative to par, not raw average strokes.
[]	Manual/Admin	Mark round final.	Only round status changes; scores/teams/payouts remain intact.

5. Results Presentation

	Step	Action	Expected Result / Notes
[]	Manual	Open /money-rounds/[id]/results on TV-sized browser.	Large presentation loads with no standard app nav.
[]	Manual	Open controller from admin.	Previous/Next and jump controls work.
[]	Manual	Step through intro, easiest/hardest, standings, skins, player payouts.	Slides show real calculated data and graceful empty states if missing.
[]	Manual	Confirm player payout summary.	Placement, skins, buy-in, and net are coherent.
[]	Manual	Confirm Parimutuel slide.	Linked market highlights appear if resolved/available; no blank broken slide.
[]	Manual	Confirm final slide.	Winning team, score, hardest hole, skins, and next-step messaging are correct.

6. Parimutuel Resolution and Settlement

	Step	Action	Expected Result / Notes
[]	Auto	After Money Round finalization, check Parimutuel market resolution.	Markets should resolve from official Money Round results where automated resolution is supported.
[]	Manual	Open Parimutuel ledger/settlement.	Nightly results are visible; end-of-camp settlement remains cumulative.
[]	Manual	Confirm no money-exchange language implies nightly payment.	Players settle once at end of camp.
[]	Manual	Check final settlement/payment report if available.	Who pays/collects is clear and minimized where supported.

Accounting Sanity Checks

Area	What to Confirm
Draft teams	Finalized draft teams should be the source of truth for Parimutuel team options and imported Money Round teams.
Bet cap	A player can place multiple bets, but not more than \$20 total per market per night.
Skins	A hole only awards a skin when exactly one team has the lowest score. No carryovers.
Partial par	Partial score-to-par compares only against holes with entered scores.
Easiest/hardest	Use average relative to par. Example: avg 3 on par 5 is -2 and beats avg 2.75 on par 3, which is -0.25, for easiest hole.
Final status	Finalizing should never wipe scores, bets, teams, or payouts.
End-of-camp	Money Rounds Bank and Parimutuel settlement are cumulative views for final accounting.

Pass / Fail Decision

	Step	Action	Expected Result / Notes
[]	Pass	Draft completion opens PM and prepares/imports the Money Round.	No manual emergency fixes needed.
[]	Pass	Money Round scores, skins, payouts, easiest/hardest, and presentations agree.	Numbers can be trusted enough for live use.
[]	Pass	Parimutuel locks and resolves without duplicate/blank markets.	Settlement remains clean.
[]	Fail	Any accounting number disappears, duplicates, or changes unexpectedly after refresh.	Stop and capture screenshot, route, round name, and exact action.

Issue Notes During Test

Time	What Happened	Fix / Follow-up
